Abstract

Currently studying Computer Science at UCT. My main objective is to gain industry experience, add new tools to my developers arsenal and gain insight into how larger scale programming projects are managed, designed and implemented.

Technical Experience

- Knowledge of Java as well as being a Python enthusiast
- Linux Server Management
- MySQL and Database architecture
- Angular Development

Business/Communications

- Well rounded conversationalist
- Organised
- Driven

Experience

Title **Internship at Citiq Prepaid (Group Project)**

Description This project involved me using Angular, Python and MYSQL while learning about development on a large scale platform.

Title **Fitness Tracker (Solo Project)**

Description Monitors your fitness progress, logs weight progression and various other fitness-aiding tools e.g. BMI Calculator

Title **Vice-Chairman of UCT Gymnastics (Group Project)**

Description Working alongside the chairperson in managing the club, conducting committee meetings, ensuring smooth functioning of the committee in performing their duties as well as dealing with general matters regarding the fruition of the club.

Title **Entelect Challenge/Google HashCode/Hacker101 CTF (Mixed Projects)**

Description Programming Competitions and CTF challenge held by Standard Bank/Google and Hacker101 respectively. Our team placed 11th place out of 61 teams in the country during the Entelect Challenge.

Note All Projects can be accessed via my website (click-able link at the top of the CV).

Education Details

High School **Wynberg Boys**
University **University of Cape Town (UCT)**
Majors **Computer Science & Mathematics**

Interests

- Information Security
- Contemporary Philosophy
- Gymnastics
- Wildlife Enthusiast
